ASIEL JOAB ROSILES GARCÍA

UX/UI Designer + Frontend development
rosiles.garcia.asiel@gmail.com
Linkedin: Asiel Rosiles

PROFESSIONAL PROFILE

UX/UI designer with strong background in frontend development (HTML, CSS/SCSS, JavaScript, and React).
I have experience designing responsive, accessible, and visually appealing digital interfaces while understanding the technical constraints and requirements involved in bringing those designs to production. This allows me to bridge the gap between design and development, creating interfaces that are not only visually cohesive but also practical, scalable, and technically viable.

HARD SKILLS

UX/UI Design: Figma, user research, user stories, Nielsen´s heuristics, usability, accesibility, sketching, user flows, wireframing, prototyping, design patterns, design systems, ui components, interaction design, motion & microinteractions, design thinking, scrum.
Frontend: HTML, CSS, JavaScript, React (Functional Components, Hooks, Context y Redux), deployment automático, responsive web design, Sass, Git, Git Bash, Github, VS Code, Yarn, Vercel, Vite.
IA: Prompt engineering, AI tools (ChatGPT, Claude Code, Opencode).

PROFESSIONAL EXPERIENCE

Design & Marketing Intern. SATECH Rastreo Satelital.
León, Guanajuato | March 2025 - September 2025.

- Redesigned corporate website interfaces by applying UX/UI and responsive design principles.
- Designed wireframes and high-fidelity prototypes for various resolutions in Figma.
- Conducted user research, market analysis, and benchmarking to guide design decisions.
- Designed and developed HTML email signatures, iterating on them to ensure compatibility across different email services.
- Performed visual and functional testing across various email clients.
- Managed tasks and deadlines using Notion and Odoo, coordinating progress with the design and marketing teams.

SELECTED PROJECTS

UX/UI Case Study: digital catalog for a small mexican business

- I interviewed a real client and translated business needs into a user-centric digital solution.
- I defined primary and secondary users, as well as their characteristics, to create a more personalized product.
- I designed the information architecture, user flows, sitemap, wireframes, high-fidelity interfaces, and interactive prototypes.
- I created reusable components, variants, and interactive elements.

Web portfolio with design system

- I created primitive and semantic tokens to build the design system. I verified the system in detail to ensure its construction was clear, well-structured and usable.
- On Figma, i made the high-fidelity design as well as its components, breakpoints, responsiveness and themes.
- I implemented the final design into a modern React aplication using Claude Code.
- I rigorously guided the AI, generating the AGENTS.md and CLAUDE.md files with the necessary specifications, requirements, and constraints. Also i sent it the design system in form of SCSS variables.

Project archive

- On Figma, i did multiple practical excercises and personal projects, where i designed wireframes, sitemaps, user flows, ui components, high-fidelity designs and interactive prototypes for fictional digital products

E-commerce with database and authentication via Firebase

- I developed an e-commerce application using React.
- I created a database and authentication methods using Google Firebase.
- I converted the application into a Single Page Application using React Router.
- I used Sass for more organized styling.
- I developed a responsive interface that adapts to different devices.

SOFT SKILLS

- **Self-taught:** I learned—and continue to learn—tools for design, development, and AI.
- **Problem-solving:** I identified and fixed bugs in real-world projects.
- **Collaboration:** I worked alongside others on web design and marketing projects.
- **Adaptability:** I participated in a variety of projects (designs, websites, signatures, prototypes).
- **Attention to detail:** I made fine-tuned adjustments to HTML/CSS code to ensure compatibility.

LANGUAGES

- Spanish: Native
- English: B2 (currently improving).

EDUCATION

Bachelor´s degree in Design, Animation and Digital Art.
Universidad Tecnológica de México (UNITEC). 2022 - 2025.

COURSES & CERTIFICATES

- Complete Web & Mobile Designer course certificate: UI/UX, Figma and more. Zero To Mastery (2024).
- User Experience Designer course certificate. Carlos Slim Foundation (2024).
- Complete React Developer course w/ Redux, Hooks, GraphQL and more. Zero To Mastery (2025 - ongoing).

VOLUNTEERING

Active member of a local church, participating in social activities, Bible teachings and the worship team. Committed to community service with a focus on leadership, dedication, and passion.
